ALUMINIUM GREENHOUSES

Design and quality.

Our aluminium greenhouses are genius in simplicity and yet - affordable and cost-efficient. We have combined functionality, quality and long-lasting aesthetic appeal that stands the test of time with.

The dynamic pace of daily life calls for innovative approaches in every aspect, therefore, we offer unique structural solutions for easier assembly.

All of the designs offered are intended to provide you with a variety of options to suit any taste and needs.

All materials used in production of greenhouses are carefully selected and production - optimised to the perfection.

**Help your customers
create their dream gardens**

EXPERIENCE. INNOVATIONS. SUSTAINABILITY.

We are a sustainability-oriented company with more than 30-year experience in creating premium quality, reliable products with high added Value for our clients all over the Europe.

Our team consists of the best product engineers who have unlimited access to the most innovative technologies, which enable the implementation of new ideas at the highest level.

A beautiful way to transform any garden into an oasis

Our top-selling aluminium greenhouses are made to perfectly fit in any garden, yard or terrace.

The versatility of design solutions is the key element that will attract more gardening enthusiasts and potential buyers.

The ability to customize color, decor and other elements is important when it comes to adjusting to clients' individual vision of the perfect outcome.

The time is now - help your clients to start a more sustainable lifestyle and being closer to nature.

	2280	660	1770	1270	1,40

Material:

Strong aluminium profiles

Aluminum profiles for greenhouse frames offer a lightweight, durable, and corrosion-resistant solution for greenhouse structure construction. These profiles provide strength and stability while allowing flexibility in design and assembly. The use of aluminum ensures long lifespan and low maintenance, making it ideal for handling various weather conditions. Additionally, aluminum profiles enable easy customization, allowing for tailored greenhouse designs for specific needs such as glass options and structural support. Overall, aluminum profiles ensure the efficiency and longevity of greenhouse facilities, serving as a reliable framework for optimal plant growth and protection.

Ridge and door height:

For 235 cm wide greenhouses:
232 cm ridge height and 165 cm door height.

For 310 cm wide greenhouses:
267 cm ridge height and 185 cm door height.

High-quality aluminum profiles for optimal durability.

Sliding door on one side or double sliding door.

Integrated gutter system

Integrated aluminium plinth.

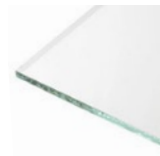

12 year warranty.

Glazing options:

Polycarbonate

Polycarbonate is a durable and lightweight material widely used in greenhouse construction due to its exceptional properties for a lower price.

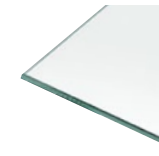

Tempered Safety Glass

4 mm tempered glass is highly resistant to impacts, making it a safe option for greenhouses where there is a risk of damage from hail, falling debris, or accidental collisions.

Tempered Self-Cleaning Glass

4 mm self-cleaning glass coating enhances transparency in wet weather conditions. It has dirt-repellent properties and contributes to less cleaning.

Tempered Mirror Glass

By reflecting sunlight, it optimizes the greenhouse environment, especially in regions with limited sunlight or during colder seasons. However, careful consideration is required to prevent potential issues such as hot spots and glare, ensuring optimal conditions for plant growth.

Crossbars:

Made from high-quality aluminum and designed to match the color of your greenhouse.
Perfect accessory to elevate the aesthetic value.

Option 1

Option 2

Roof window opener:

Automatic greenhouse window opener ventilates your greenhouse even when you are elsewhere!
Starts opening at +15-25°C.
The window opener opens up to 45 cm.

Storm-proof automatic window opener that can lift 70% more weight than our smaller openers. Compact design - the opener will always fit within the window frame. It has a wide opening range, allowing for optimal conditions for plants.

Door options:

Single sliding door

Extra sliding door

Double sliding door

Greenhouse Height:

Standard

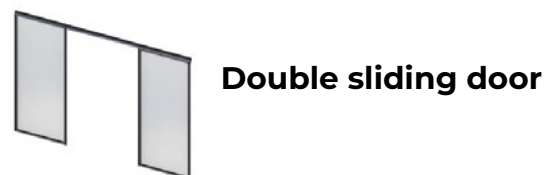

+20 cm

Painting the greenhouse in your color of choice:

RAL color options that we offer

Decorative roof ridge:

Roof window opener:

We have developed a special technology for applying the paint on aluminium greenhouses that guarantees a perfectly even and smooth finish.

As with every element of the home, we only choose products and surface treatments from world-renowned manufacturers, so we can guarantee that the paint will maintain the shade and protect the aluminium profiles in the long term.

We make sure that every customer receives only the highest quality product, which is why every order is manually quality checked for all elements, including the paintwork, both during the manufacturing process and before the product is ready for delivery.

The aluminium greenhouse and its design elements can be painted in different colors or matched to a single shade.
